

EPP Composites Pvt. Ltd.

Exclusively **Engineered** Fibre Glass Doors

SMC Doors

SMC Doors

EPP SMC Doors come with exceptional features in incomparable designs. SMC Technology allows us to offer eye catching designs with strength and excellent finish. All this adds one more reason for your neighbors to envy your domicile. Exceptional high definition lines and textures with range of designs are unmatchable in conventional Wooden and Steel Doors. EPP provides LVL Engineered Wooden lock block reinforcement in each Door, which makes it safer than Steel with beauty of wood without worrying of Splitting, Warping and Termites for Ages.

SMC represents Sheet Moulding Compound which is a compound raw material of fiberglass, unsaturated polyester resin, calcium carbonate or aluminum trihydrate fillers, catalyst, thickening agent and pigment, processed through an SMC machine. This sheet material is put into a steel mould with high temperature and extreme pressure to mould the finished parts per cycle increasing its molecular strength. It also produces high definition textures and astonishing impressions enhancing its aesthetic value.

EPP's SMC Doors are available with perfectly complementing right angled FRP Door Frames in matching colours.
