

EPP-PCIC TEAM AT THE SOX NOX 2019

CONFERENCE SEPTEMBER 12-13 AT NEW DELHI ORGANIZED BY MISSION ENERGY FOUNDATION .

The conference was quite successful in providing insights needed for the very ambitious air pollution control program which is being undertaken.

Key Highlights include EPP - PCIC (Plasticon Group) partnership Annoucement, showcasing the FGD Equipment's - corrosion resistant Fiber reinforced Plastic cases.

Mr . Jan Anno Vander Laan – Sr Manger Business Development – PCIC Netherland BV Presented paper on “ Use of Fiber Reinforced Plastic in Flue Gas Desulfurization applications in high temperature conditions ” under the Session theme “Pollution Monitoring / Control Technologies, Equipment’s and other Retrofit Solutions”

The Expo and the Paper was well received by the Industry experts , and the event gave excellent opportunity to interact with leaders from NTPC, TATA , EIL, IFFCO, Mahagenco , Singareni Collieries.

The Forum helped Discussions with Key Members of MOEF , India Energy Forum, Council on Energy Environment and Water on the use of FRP Technologies in FGD applications , its advantages , Service and Ease of applications , Life Cycle Cost , and CAPEX & OPEX experience from Global Power plant cases .

Besides this there has been Keen Interest shown by Cement Plant Utilities on the Corrosion resistant FRP Technology to name few JK Cement, Ultratech , Orient Cement
